

Curriculum Vitae

Andrew Ellis

Professional Experience

1999 - to date	Senior Consultant – Noble Health & Safety Consultancy Ltd
1995 - 1999	Health & Safety Advisor - Personnel/Direct Services Department Plymouth City Council
1990 - 1995	Health & Safety Enforcement Officer - Environmental Health Plymouth City Council
1974 - 1990	Petty Officer Medical Assistant Royal Navy working with Commando Forces

Director of Noble Health and Safety Consultancy Ltd / Noble Asbestos Consultancy Ltd 2003 - date

- I am at present covering a large, diverse area of work, encompassing audit, expert witness statements, asbestos, safety management, training, as well as general Health and Safety advice. My paramedical background does allow me to ensure the health issues and aspects are encompassed and strategies devised from a practical basis. Since 2003, I have been a Company Director with management and the growth of the business.

Health and Safety Advisor - 1995 - 1999

I was primarily working with the management of a very manual labour intensive organisation with both contract and political constraints. I have become acquainted and worked with the high risks of direct labour which has included catering, workshops, construction, grounds maintenance, refuse and drainage work.

Although I primarily worked for the Direct Services Department, as I was accepted throughout the Authority as being impartial, I was also required to investigate where there were controversial or financial implications, and produce the necessary reports and recommendations.

I became the lead officer for risk assessments within the Local Authority and designed the procedures and systems of work, producing the employee safety handbooks that have been reproduced by other organisations.
